1. Receipt is acknowledged of the election filed July 16, 2002 and the IDS filed September 11, 2002.

2. Applicant has elected with traverse Group I, claims 1-15 for examination.

Claims 5, 6, 14 and 16-30 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention or species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9 dated July 16, 2002.

The arguments have been deemed not to be persuasive since the search and examination requires a totally different search and examination based on the search in the shoes as well as any computerized search, which requires different end products. The restriction requirement was proper as stated in the previous office action and has been made final.

Claims 1-4, 7-13 and 15 are drawn to the elected Invention and species.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-15 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over DE4015851, and Liu et al, Computer Abs

Art Unit: 1651

1993:233484 or in the alternative as being obvious over DE4015851 further in view of Turner, U.S. 6,288,275 or U.S. Mobley et al U. S. 6,004,784 for the strains of claims 8-10.

Claims 1-3 and 7, 8,10-11 are anticipated by DE4015851 which teaches the same substrate in example 1 as well as the advantages of employing the use of well known mutants which interrupt the beta-oxidation pathway, see page 4. The reference also teaches the employment of an organic solvent prior to the fermentation, see page 5.

Claims 12 and 15 are rejected under 35 U.S.C. 102(b) as anticipated by Liu et al, Computer Abs 1993:233484. Liu et al teaches the production of a carboxylic acid employing dodecene as the substrate.

Claims 4, 9 and 13 are rejected under 35 U.S.C. 103(a) obvious over DE4015851 or Liu et al further in view of obvious over U.S. 5,620,878 or U.S. 5,648,247. It would have been prima facie obvious to employ the strains disclosed by Mobley et al U.S. 6,004,784 [column 2, lines 25-45] or Turner U. S. 6,288,275, for those of DE4015851 or Liu et al as well as adding a solvent in view of the teachings of Turner

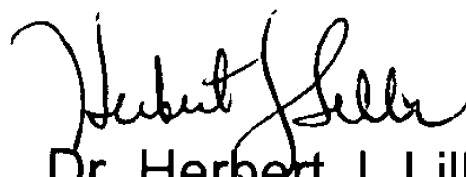

“....to enhance phase separation, an organic solvent may be added to the fermentation broth prior to.....adjusting the pH of the broth. Suitable solvents are those with minimum water solubility and maximum solubility of the carboxylic acid in the organic phase. Suitable organic solvents include, but are not limited to, aliphatic hydrocarbons, aromatic hydrocarbons, aldehydes, ketones, ethers, alcohols, esters, acids, amides, amines and halogenated hydrocarbons. “
